

Certificate in Digital and IT Skills - C136

Are you eager to enhance your digital and IT skills for personal or professional growth? Our Level Certificate in Digital and IT Skills is designed to provide you with the essential skills and knowledge needed to navigate the digital world confidently. This course is perfect for people who want to improve their IT proficiency and prepare for career opportunities in the tech industry.

COURSE DETAILS

Throughout this course, you will explore a variety of digital and IT skills through both theoretical and practical learning. Key areas of study include:

- IT User Fundamentals: Learn the basics of using computers and digital devices effectively.
- Word Processing: Develop skills in creating, editing, and formatting documents using word processing software.
- Spreadsheets: Gain proficiency in using spreadsheet software to organize, analyze, and present data.
- Presentations: Learn how to create engaging presentations using presentation software.
- Internet and Email: Understand how to use the internet and email safely and effectively for communication and research.
- Digital Communication: Explore various digital communication tools and platforms.

ENTRY GUIDELINES

You must be 19 or over to study on this course.

You do not need formal qualifications for this course but will be considered on your individual skills and experience. You must be able to follow instructions, be willing to work independently, produce answers in a clear and understandable form and organise information clearly.

You must complete a satisfactory interview and demonstrate your interest in a digital and IT skills career pathway.

If English is not your first language, you may need an assessment before enrolling on this course. To discuss further, please contact the ESOL department on 0151 551 7144.

ASSESSMENT METHOD

Your progress will be assessed through a combination of practical tasks, written assignments, and online tests. You will compile a portfolio of evidence to demonstrate your competence.

ADDITIONAL INFORMATION

This course includes opportunities for hands-on experience with digital technologies, providing you with practical skills that are highly valued in today's job market. You will also have access to our state-of-the-art computer labs and resources.
